Coated tablets

Based on an innovative ingredient – **glucomannan** – which, when combined with a low calorie diet, affects weight loss. **Chromium** helps maintain normal blood glucose levels by reducing cravings for sweets and the desire to snack between meals. **Garcinia cambogia extract**, in turn, is a source of hydroxycitric acid (HCA), which slows down the formation of body fat.

Take 2 tablets 3 times a day, rinsed with a lot of water (1 or 2 glasses).

Effervescent tablets – grape flavour

Intend to supplement the vitamins and minerals which are lost by reducing the daily food intake. Created to let you keep beautiful skin. **Vitamin C** supports formation of collagen, whereas biotin and **vitamin B2** help maintain a healthy complexion. **Calcium** has an effect on the proper functioning of digestive enzymes.

Dissolve 1 tablet in a glass (200 ml) water a day. Drink before a meal.

GLUCOMANNAN – APPETITE KILLER

Glucomannan is a dietary fibre soluble in water, extracted from the *Amorphophallus Konjac* plant. As it expands in stomach, glucomannan fills it and as a result sends a signal to the satiety centre, in the hypothalamus of your brain, that you are not hungry. This helps to cut the number and size of meals. Research shows that the use of glucomannan, along with a reduced calorie diet, decreases body weight in overweight people by an average of 3 kg per month¹. For glucomannan to do its job, make sure that you take the tablets with plenty of water.
